Mr. Richard J. Carpiano  
Regional Sales Manager  
Universal Valve Company, Inc.  
478 Schiller Street  
Elizabeth, New Jersey 07206

#95-39

Dear Mr. Carpiano:

Approval of Universal Valve Model 0611VC Vapor Adapter

Mr. Michael Breheny, of Universal Valve Company, requested California Air Resources Board (CARB) certification of the Universal Valve Company Model 0611VC vapor check valve adapter on October 18, 1994.

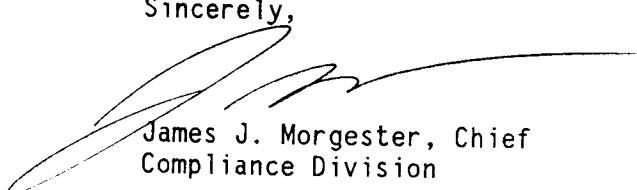

The Universal Valve Company Model 0611VC vapor check valve adapter is similar to the CARB approved Universal Valve 0611V adapter (listed in CARB Executive Order G-70-97-A). Both units are designed to be installed on the vapor return portion of a dual point Phase I vapor recovery system. Both the 0611VC and the certified 0611V units employ the same external housing and internal parts. The only difference between the two units is the type of poppet they employ. The 0611VC uses a poppet disc with a viton o-ring seal while the 0611V uses a sandwich disc type poppet with a buna n seal. Except for this difference, the 0611VC and the 0611V are identical.

As required by the Air Resources Board certification procedures, you requested the approval of the Division of Occupational Safety and Health, the Office of the State Fire Marshal and the Department of Food and Agriculture, Division of Measurement Standards. The necessary approvals have been obtained from these agencies.

I find that the use of the 0611VC vapor adapter, when installed in accordance with the manufacturer's instructions, will not adversely affect the performance of two point Phase I vapor recovery systems on which it is installed. Therefore, the Universal Valve Company Model 0611VC vapor check valve adapter is certified for use with CARB approved two point Phase I vapor recovery systems.

Should you have any questions or need further assistance, please contact Mr. Basharat Iqbal at (916) 324-7343 or Ms. Laura Sullivan McKinney at (916) 327-1525.

Sincerely,

James J. Morgester, Chief  
Compliance Division
